## AGENDA

**Coffee** 10.00 -10.30am

**10:30** Introduction

**Arthur Griffiths (Tripartite Working Group Project Manager)**

**10:40** The biology of *L. Salmonis*, and sentinel cage work in Loch Torridon.

- Experiences and lessons learned. **Campbell Pert (FRS Marine Laboratory)**

**11:00** Shoreline densities of *Lepeoptheirus salmonis* larvae in Loch Torridon 1999 to 2009.

**Jim Raffell (FRS Shieldaig Field Station)**

**11:20** Sea lice larvae distribution

**Michael Penston (FRS Marine Laboratory)**

**11:40** Short refreshment break

**11:50** A review of Sea lice monitoring of wild fish in the WRFT area in 2007 and 2008

**Peter Cunningham (WRFT)**

**12:10** Update on sea lice control at WRF Ardmair & Corry sites. Ardessie site update

**Hugh Richards (Wester Ross Fisheries Ltd.)**

**12:30** 'Mucal barrier technology: Developments in sea lice treatments'.

**Chris Wallace (Marine Harvest)**

**12:50 Structured discussion to address the following:**

1. What questions can we address with sea lice data collection?
2. Are our methods of data collection adequate to answer the questions?
3. What, if any, additional work would be useful over the coming season?
4. Who is able to help collect data?
5. What equipment / training do they require?

**Buffet lunch (suggested donation £4)**
